2 of 2 (disregard my earlier email that said 1 of 3 – sorry, thought I had a third).

Hello Leanne,

As requested, please find attached to this email one PDF comprising the latest version of the "Flexible Air Permit" for our facility located in Brownwood, TX.

Also, please find attached three PDFs comprising meeting minutes for the process by which the original 3M Nevada "Flexible Air Permit" was developed. If I can help focus your review: the August 19, 2003 minutes suggest the issue was raised regarding "non-exempt increases" for the non-VOC pollutants. The December 3, 2003 minutes (specifically on page 4 of 6, for the discussion on Special Condition #23) then suggest this issue was resolved. There are several other nuggets of insightful information in these documents that you may also find valuable.

Thank you again for your participation on this afternoon's call. We look forward to speaking with you again, soon.
